

Q1. Answer = true

Q2. Answer = false

Q3. Answer = true

Q4. Answer = false

Q5. Answer = triple duplicate ACK

Q6. Answer = No

Q7. Answer = Time out

Q8. Answer = No

Q9. Answer = Less

Q10. Answer = The slow start period will find out that the maximum acceptable throughput that the path supports otherwise, additive increase would take too long

Q11. Answer =?

Q12. Answer = C

Q13 Answer = C

Q14 Answer = B

Q15 Answer = Changing cross traffic by other concurrent senders across same routers
